Business Requirements Document (BRD)
Todo List Application

---

1. Purpose

The purpose of this document is to define the business requirements for a Todo List Application that enables users to manage tasks efficiently, with administrative oversight and structured organization.

2. Scope

The application supports authentication, role management, todo management, category management, reminders, attachments, recurring todos, and reporting capabilities.

3. User Roles

User
• Manage personal todos and categories
• View only personal data

Admin
• View and modify all users' todos
• Delete users and reset passwords
• Create admin users
• Cannot create todos

4. Authentication & User Management

• Users can register accounts
• Users can log in and log out
• Users can change passwords
• Admins can reset user passwords
• Only admins can create admin users

5. Todo Management

Users can:
• Create todos
• Edit todos
• Delete todos
• Mark todos as completed

Todo properties include:
• Title
• Description

• Category
• Priority (High / Medium / Low)
• Expiry date
• Attachments
• Recurring settings

6. Todo Behavior

• Completed todos should appear with a strikethrough style
• Completed todos should move to a Done section
• Users can only see their own todos
• Admins can access all todos

7. Category Management

• Users can create categories
• Users can delete categories
• If a category contains linked todos, the system should display a confirmation dialog with the following options:
  - Delete category with all linked todos
  - Delete category and keep todos without category

8. Attachments

• Users can upload attachments to todos
• Users can view and remove attachments
• All file types are supported
• Maximum attachment size is 2MB

9. Reminders & Expiry

• Todos can include optional expiry dates
• The system should support in-app reminders
• Expired todos may be highlighted for users

10. Recurring Todos

• Users can create recurring todos
• Supported recurrence types:
  - Daily
  - Weekly
  - Monthly
• When a recurring todo is completed or expired, a new occurrence should be generated automatically

11. Search, Filter, and Sorting

• Users can search todos by title and description
• Users can filter todos by:
  - Status
  - Category
  - Priority
  - Expiry date
• Users can sort todos by:
  - Creation date
  - Expiry date
  - Priority
  - Status

12. Business Rules

• Each todo belongs to one user only
• Each todo can be linked to only one category
• Admin users cannot create todos
• Users cannot access other users’ data

13. Future Considerations

The following items are considered out of scope for the current phase:
• Push notifications
• Email reminders
• Shared todos between users
• Activity logs
